

Guidelines for Letter of Intent

The Letters of Intent are submitted using ProposalCentral. The ProposalCentral portal will be open October 17, 2022. The submission should consist of:

Letter of Intent

- Proposed research (2 page maximum)
- Applicant's NIH Biosketch
- Mentor's NIH Biosketch

Applicants should have an MD / DO, or PhD (or equivalent) and be a senior clinical or postdoctoral fellow, or junior faculty within the first five years of appointment at a rank of Instructor or Assistant Professor. Research must be undertaken at an institution within the United States or Canada.

Applicants in their last year of fellowship must have an institutional commitment that they will transition to a junior faculty position at or shortly after the time of the award. Successful applicants will have demonstrated interest and productivity in translational sarcoma research.

Applicants who have already secured substantial NIH support in the form of a mentored career development award (e.g. K08), an R21, or an R01 are not eligible. Applicant should state a commitment to at least 50% protected research time.
